DOOR-SLOTS EXPEDITE

DELIVERY OF THE MAIL

Washington, Nov. 21.—Reports that the post office department has decided to suspend the installation of door-slots and receptacles at the homes of mail patrons throughout the country to expedite delivery of the mails, is producing the result.

There is made public a list of 61 cities in which every residence in town has been equipped with mail boxes. This list was limited to three towns and cities in each state and it was said that many more could have been included.

This is the strongest kind of testimony to the intelligent activity of our carriers and the organized activity of our postmasters," said Postmaster General Clegg. "It also reflects the spirit of public cooperation, and even patriotism, which is so ready to assist when appealed to by the government."

DEEPER RIVER CHANNEL TO CITY TOUCHES EVERY POCKETBOOK

If the Norwich meeting next Friday can convince Mayor V. R. Peterson, the government engineer, that the citizens are united solidly in their demand for a deeper channel in the Thames river to Norwich, every pocketbook can be touched.

Not only every pocketbook can be touched, but the rate of freight rates will be affected, and the rate of boat to New London will be affected.

For that reason, declared the business men, there should be a big attendance of merchants and manufacturers and citizens in general at the hearing at the council chamber at 1:30 Friday afternoon when Mayor Peterson will listen to the reasons why Norwich wants a deeper channel in the river.

From Allen's Point up to the city there is a 14 foot channel, 200 feet wide, but this depth is hardly enough. The steamers Cape Cod, which runs to the city, draw 15 feet, and with the wind in the northwest the water drops so low that she cannot get up the river.

The channel width is not any too great for the river there are only three points where the river narrows, and the channel can turn around. There are at Montville, at a point south of Poquonoc Cove, and at Central Wharf at the city.

A. Skelly, who will speak at the hearing, said that the river is only 16 feet in depth and 200 feet in width in order that the river may be made navigable not only for larger boats but also for much boats as already use the river.

Unless Norwich keeps its river navigable it will not be long before freight rates taken out of the city will be increased, this business man declared. The Thames as a navigable river is a valuable asset to every citizen and every business interest of the city, which must not be lost.
